Together We Can

PBLD

## Acute Pain

A 29year old male patient is presenting for semi-elective low back surgery. He is a recovering substance addict (including opioids) and is very worried about "getting hooked" again if he is given narcotics. The delegates in this session will discuss the different interventions that are possible to address pain management in the patient who is a recovering addict.

- Educational interventions.
- Psychological interventions.
- Medical interventions.

**Facilitators:** Gauhar Afshan, Pakistan
